CAREER OBJECTIVE

Seeking a role as a Full-Stack Developer where I can apply my experience with the MERN stack, Next.js, TypeScript and blockchain technologies to design and develop scalable, user-centric web applications while leveraging modern development tools and frameworks.

WORK EXPERIENCE

Purezza Technologies , Gujarat

(Remote Internship)

Jan 2024 – Mar 2024

- Created responsive, consistent designs for two major projects: a **Resume Creation Site** and a **Matrimony Site**.
- Collaborated with a team to build components for a full-stack application using React, React Redux and Node.js.
- Assisted in payment gateway integration and API development for seamless transaction processing.

SKILLS

- Next.js, TypeScript, Node.js
- Prisma ORM, PostgreSQL, MongoDB
- MERN Stack (Full-Stack)
- Rest APIs, Tailwind CSS
- Docker (Deployment), Git
- HTML, CSS, JavaScript
- WebSockets
- Web 3 (Solana, Ethereum)
- Rust, Solidity (Smart Contracts)

PROJECTS

Safe - Shipping

[Github](#) [Try it out](#)

Developed a decentralized freelancing platform using Solana Blockchain, enhancing transparency in freelance work and transactions.

(Solana Blockchain | Rust | Solana SDK | Typescript | NextJs)

Food - Copilot

[Github](#) [Try it out](#)

A ML based smart application designed to manage food items, plan meals according to schedule, and receive personalized recipe suggestions.

(Gemini API | Spoon API | TypeScript | Next.js | Tailwind CSS)

E-commerce Grocery Store

[Github](#) [Try it out](#)

Sample E-commerce website to buy grocery items of different categories.

(MongoDB | ExpressJS | React | NodeJS | React Redux | Auth System)

EDUCATION

Bachelors in Computer Application (BCA) 2022-2025

Nims University, Rajasthan, Jaipur

Secondary Education 2019-2021

Emmanuel Sr. Sec School, Jhalawar, Rajasthan

81.6%

ACHIEVEMENTS

Winner (Scroll Category) - BlockMagic Hackathon

May-June 2024

Developed Ringle, a decentralized exchange (AMM) for buying and selling NFTs, won under Scroll Category out of 300+ Projects and 1800+ participants.

- Built the platform on the **Ethereum blockchain** with integration to **Polygon** for scaling and lower transaction costs.
- Designed and deployed **smart contracts** using Solidity to enable automated liquidity provision for NFTs.
- Led a 3-person team to design the frontend (Next.js) and project management.

Third Winner - Innovation Think Tank (ITTCP), India

August 2024

- Showcased multiple solutions focusing on the intersection of medicine and technology, hosted by IITCP.
- Collaborated with a team of 8 members from diverse backgrounds including medical and engineering.

INTERESTS

- Playing Chess
- Reading business-related books
- Sketching & Doodling

LANGUAGES

- English
- Hindi

One of the Winners - 100x Devs Mini Hackathon

September 2024

- Wallet Adapter** for Web-Based Wallet on **Solana** blockchain.
- Created and published npm package for wallet adapter in JavaScript for connecting web based wallets and transaction signing.
